OUR PROFILE

AGRIHORT FARM SOLUTIONS is an agricultural consultancy firm registered in Kenya since 2016. We are located along Kimbo-Matangi road, off Thika Super Highway in Ruiru, Kenya. The firm was founded by Dr. Bernard Gichimu, a seasoned researcher, a University Lecturer and an international consultant particularly on matters pertaining to the Coffee Value Chain “from Seed to Cup”. Currently, the company has a pool of dedicated international experts in all the agricultural fields and disciplines that are usually engaged on need basis. In addition, the company maintains a list of young and enthusiastic agricultural assistants and enumerators that are usually on call whenever they are required. Due to the great passion for Dr. Gichimu in the development of the coffee sector, AGRIHORT FARM SOLUTIONS has been focusing more on coffee related activities than on other crops. The company has implemented more than 15 consultancy missions in East Africa and in some parts of the Sub-Saharan Africa. Some of the international organizations we have worked with include the European Union, Food and Agriculture Organization of United Nations, Solidaridad East and Central Africa, World Coffee Research, Fairtrade Africa, International Trade Centre, Global Coffee Platform, Kenya Coffee Platform among others. In addition, the company has worked with renowned coffee roasters and trading companies including the Kenyan based Connect Coffee Company Ltd, Trabocca BV in the Netherlands, Counter Culture Coffee, and California Coffee Importers based in Kenya and USA. The firm also conducts farm based agricultural trainings and tailor-made short courses in different aspects within the agricultural value chain. Our resolve is to continue growing our network within and beyond and to continue building our capacity to offer unmatched services to our esteemed clients.
